

THE  
BRITISH DIARY;  
BEING AN  
EPHEMERIS  
FOR THE

Year of our LORD GOD, 1746.

Being the Second after Bissextile or Leap-Year.

The Seventh Impression.

Wherein are contained the Planets Diurnal Motions, their Aspects and Latitudes; Eclipses, Lunations, Length of Days, the Sun's Rising and Setting for three several Latitudes. The Moon's Rising, South-ing, and Setting. With Astrological Observations on the Solar Ingresses, and a short Discourse on the late Great Comet. A Table of Houses for the La-titude of London  $51^{\circ} 32'$ , and many Tables and Things fit for such a Work. Calculated for the Latitude of London  $51^{\circ} 32'$ .

By JOHN SHARP, Student in the  
Cœlestial Sciences.

Imprimatur THOMAS CARTWRIGHT.

Sun sets					Sun rises				

To find the Sun's Rising and Setting, when the Sun's Declination is North, find the Sun's Rising and Setting at the Head of the Table, and Declination North to the Left-hand; but, when the Declination is South, find the Sun's Rising and Setting at the Bottom of the Table, and Declination South to the Right-hand. Example: ☉ Dec. 7 d. N. and S. At what time does ☉ R. and S. at Liverpool. ☉ Dec. 7 d. N. ☉ R. 5. 22. S. 6. 38. ☉ Dec. 7 d. S. ☉ R. 6. 38. and S. 5. 22.

Sharp.

January hath XXXI Days.

Last Quarter 3d day, 5 min. past 1 afternoon.  
 New Moon 10th day, 12 min. past 4 afternoon.  
 First Quarter 18th day, 34 min. past 7 at night.  
 Full Moon 26th day, 17 min. past 4 morning.  
 The 18th day Saturn rises 23 min. past 10 at  
 night, and Jupiter 44 min. past 3 morning.

or else our Prayers will avail us nothing. And now I am giving  
Account of the Weather, I care not if I give you some particular Day,  
or Weather we shall have; but take Notice before I begin, I will have  
Days; so that if we have such Weather as I name, either that Day, or  
Day before, or the Day after, I account myself right; not but that we  
have more Liberty than that, for we should have three Days in the  
Moon's Aspect; and seven in Aspects of the primary Planets. Also the pri-

For a Conclusion, pray take Notice if it be not a Year of much tem-  
 stormy Weather, with much Rain and Thunder, and at some times  
 dry; and a much better Summer than any we have lately had. And  
 fear much bad Weather in the Harvest. Also March and May (as  
 other Times) like to be Months of much Action and War among  
 us; and all the Year find much Work for the Doctors of Physick;  
 perhaps not so much for the Doctors of Divinity, because Men gene-

December 1746.

Sharp.

Take more Care of their Bodies than of their Souls. For if they took  
 of their Souls, they would leave off their Fraud, Deceit, and Covetous-  
 and other Wickedness which so much abounds in the World. *The good*  
*is perished out of the Earth, and there is none upright among Men: They*  
*wait for Blood; they hunt every Man his Brother with a Net. Micah*  
*2. The best of them is as a Brier; the most Upright is sharper than a*  
*Thistle. Verse 4.*

A great Frost for 9 Weeks, beginning December 25, } 1739, ending February 27 following }	6
A sur-	

## *A Brief Chronology of remarkable Things.*

Since { A surprising Meteor seen by Day, December 17. Also another Meteor seen the 7th Day  
 { A Comet seen in February and March.  
 { A Comet seen in December 1743, and January and February following  
 { Several Meteor in July 1745, as the 5th, 14th, and 16th Day

### *Of Eclipses this Year 1746.*

**T**HERE will be four Eclipses, and they happen in the following Manner; viz. the first is of the Moon, invisible, Feb. 24, between 4 in the Afternoon: The second is of the Sun, invisible also, March about 3 Quarters past 2 in the Morning, in  $\gamma$  1° 22'. The third is of the Moon, and visible August 19, beginning 46 Minutes past 10 at Night, the Middle 4 Minutes past 12, and the End 22 Minutes past 1 in Morning. The total Duration is 2 Hours and 36 Minutes; the Digits eclipsed are 6° 61, on the upper Part, or North Side, this Eclipse falls in the Decanate of  $\times$ , and in the tenth House of Heaven, Jupiter is Lord of Eclipse, and is posited on the 6th, and Lord thereof in  $\zeta$ , with the Sacred Heart, and in  $\square$  to the Luminaries in  $\Delta$  to  $\zeta$  and  $\ast$  of  $\text{h}$  and  $\text{q}$ , are in  $\zeta$  on the Cusp of the 5th; it hath Significations of Disorders in Blood, Infirmities and Diseases, Schisms and Divisions, Alterations in Religion, Detriments and Debates amongst Priests; the Death or Downfall of some great and mighty Person; Damage to Fish, dangerous Navigations, the overflowing of the Sea and Rivers; and some young Lady to be cruel and deluded by the cold Embraces of an old Fornicator. The fourth is of the Sun, Sept. 4th, near 9 in the Morning, yet invisible to us in England, by Reason of the Moon's great South Latitude; but in the South Parts of the World it will be very great.

### *Astrological Observations upon the four Quarterly Ingresses of the Sun into the four Cardinal Points, and first of the*

#### *Winter Quarter.*

**W**HICH begins this Year, Decem. the 10th, 45' past 3 in the Afternoon, 1745, at which Time 0° 26' of  $\text{g}$  ascends, and 24° 4' is on the M. C. the Planets are mostly in good Configurations to themselves, but obscurely placed in the Houses;  $\text{h}$  is in  $\text{g}$ , in the fifth to  $\text{g}$  in  $\text{g}$  on the Cusp of the ninth,  $\text{v}$  and  $\text{q}$  in  $\text{g}$  in  $\text{f}$  in the sixth, with the Scorpion's Heart in  $\ast$  to  $\text{h}$  and  $\text{g}$ ; and the Moon in  $\text{f}$  in the sixth, separating from the Bodies of  $\text{v}$  and  $\text{q}$ , and the  $\ast$  of  $\text{g}$ , and plying to the  $\ast$  of  $\text{h}$ , and after that at a great Distance, going to the  $\ast$  of the Sun;  $\text{q}$  in  $\text{v}$  in the 7th, in  $\square$  to  $\text{h}$  in  $\text{g}$  in the 5th, and the  $\text{v}$  descending on the Cusp of the 7th;  $\text{g}$  in the End of  $\times$  in the 11th, then by Consequence the  $\text{g}$  must be in the 5th in the End of  $\text{v}$ , is the Position of Heaven, at the Time of this Ingress; from which we conclude that Things will lie hush and quiet great Part of this Quarter, specially the former Part thereof; and as  $\text{h}$  and  $\text{g}$  are in  $\Delta$ , and  $\text{h}$  and  $\text{g}$  in  $\ast$  to them both; and that  $\text{v}$  makes a threefold  $\ast$  with  $\text{h}$  this and he strong in his own House all the Time; so there may be Treaties, and Preparations made for Peace this Year among several of Princes engaged in War, yet at last come to nothing; and my Reason is, you shall have in the Spring Quarter. The  $\text{d}$  is both general and particular Significator of the common People, and she in good Company, but separated

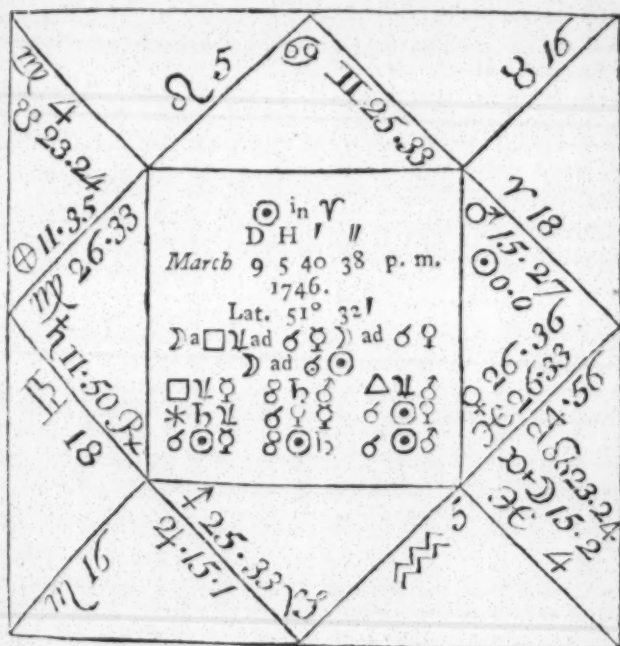

## Astrological Observations, &c.

The People may be in good Condition at present, but alas, it will not hold for the is going at a great Distance to the ☿ of ☉ and in an obscure sign. ♀ in the 5th in ☐ with ☿ Lord of the 5th in ♍, and the ☿ of the Ascendant in the 6th, in ♀ with ♀, and ☿ in the 5th also, to signify Dangers to Women in Child-Birth, and more Infirmities in Spring than usual. There may also be some slight Diseases this Quarter, the raging Distempers, the Sun descending on the Cusp of the 7th, and going to the ☐ of ♀ Lord of the 10th in the 5th, the 8th from the ☐, and ♀ in ☐ with ☿ Lord of the 5th, declares the Death or Downfall of some great and mighty Person; and that perhaps by the Means of another great and mighty as he, and this perhaps in *March*, when the ☉ and ☿ make their ☿s with ♀; also the ☐ of ♀ and ☿ may cause much News, and some Ambassador found out in his Roguery. As to the Weather, I take it to incline to Wind and Rain and many Storms; but warm for the Season; and that the Wind will incline much to the West and South-West.

### The Spring Quarter.

Begins this Year 1746, *March* the 9th, 40' 38" past 5 in the Afternoon; the Planets are posited as the following Scheme Represents.

Wherein we find ♀ and ☿ in ♌, and that nearly from Angulus; ♀ being in the Ascendant, and ☿ just entering the 7th, nearly on the Cusp of the 8th, and they both very strong, ♀ in his Exaltation, and ☿ in ♍ his own House, but under the

## *Astrological Observations, &c.*

the Sun-beams, and the ☉ applying to the ♀ of ♀ also from the 7th, and Ascendant, a most angry and violent Position good Earnest; denoting Wars, Slaughter, and Oppression; what not as is Evil: And not only a violent Position in it but to add to the Fury thereof, ♀ is exactly on the Place of Appearance of the late Comet, according to the Longitude, from whence we may now expect the Effects of that to appear in Colours, both in Wars, in the Air as to tempestuous Weather, and in Mens Bodies as to Diseases, &c. Wherefore, notwithstanding the threefold \* of ♀ and ♀ there can be no Peace made or expected; but on the contrary War carried on with much Vigour and Violence, Cruelty and Destruction; for what can a more violent Position than ☉ and ♀ in ♀ in ♀ from Aries and Cardinal Signs; and also made much the worse by being on the Place of the Comet, and ♀ in ♀ to it. The common People are signified by ♀ and the Moon, and ♀ descends on the Cusp of the 7th in ♀ his Detriment and Combust; and the ♀ in the 6th disposed of by the Lord of the 6th, and in ☐ to him, and going to the Body of the Sun: Venus Lady of our 2d Combust also, and ♀ in ♀ to the therefore Sicknefs, Want and Poverty is like to be our Portion with much Mortality and many Deaths, want of Trade, Complaints, with the Death of much large Cattle. God Lord deliver us from the Evils that are coming, as the Name of the Diseases, I take them to be burning Fivers, Small-pox and Measles, with Diseases of the Head and Reins. God by his Mercy keep us free from pestilential Diseases. Great and mighty Persons are signified by ♀ and the Luminaries, and they all terribly afflicted, therefore there is no Rank nor Degree like to escape the Fury of those violent Positions. At the New Moon proceeding the Ingress, the Moon is eclipsed in the second Face of ♀, and in the 2d House. And at the New Moon proceeding, the Sun is eclipsed in the 1st Face of ♀ in the 1st House also. The Luminaries are now applying to the ♀ of ♀ and ♀ of ♀, Poverty, Want and War, with Sedition and Tumults, and intemperate Air are like to be the Consequence thereof. And as touching the Weather more particularly I judged it to be inclined to much Intemperance, as March with Wind and tempestuous Storms, May to tempestuous Thunder and Storm, and April which is like to be the most moderate to much moisture and some blites; and indeed I fear much blighting Weather in all three of the Months very hurtful to the Fruit of the Earth, and much damage to Corn by unseasonable Weather.

## Astrological Observations, &c.

### *The Summer Quarter.*

Begins this Year 1746, *June* the 10th 44' 41" past 4 After-  
noon, at which Time 19° 53' of ♀ ascends, and 9° 40' of  
♂ is on the M. C. ♂ Lord of the Ascendant is combust in the  
House, and ☉ in the 8th in ☿ going to the ☐ of ♄ in ♌,  
♄ in ♌ with ♀ and \* with ♃, and ♃ and ♀ in ♄ from  
the Ascendant and 7th both in their own Houses, and the ♃ in  
the 10th with Affelus separating from the Body of ♀, and applying  
to the \* of ♄, Δ of ♃, and \* of ♀, from whence we  
may with Reason conclude, that Sicknes and Diseases are like  
to be both raging and mortal, especially those of a feverish kind;  
that War is likely to be carried on with much violence  
where Soldiers are in Arms. With many Troubles and Com-  
motions, and that among all People of all Ranks and Degrees,  
to add to the Fury of these ill Rays, at the New Moon pre-  
ceding the Ingress ♃ and ♀ are in ♄ from the Ascendant, and  
♄, only at the Ingress ♃ is in the Ascendant, and ♀ in  
the 7th, and at the New Moon ♀ is in the Ascendant, and ♃  
in the 7th, and at both the New Moon preceding and Full Moon  
preceding ♄ is in the 6th in the former the Luminaries apply  
to ☐, but in the latter he is in exact ☐ to the Luminaries,  
the ♃ in the 8th disposed of by ♄ Lord of the 8th; from  
whence also we may justly fear many Troubles and Confusion  
of Sicknes, much Mortality and many Deaths: As touching  
the Weather this Quarter I take it to incline to Wind, Storms,  
and Thunder.

### *The Autumn Quarter.*

Begins this Year 1746, *September* 12 m. 12' 32" past 6 in  
Morning, which Time 2° 7' of ♌ ascends, and 2° 4' 5  
♄ is on the M. C. ♄ is in the Ascendant in ♌, and the  
☉ in the Cusp of the Ascendant applying to ♂ with ♄,  
♄ in exact ☐ to the ♃ in the fourth; which seems to  
signify Trouble, Sicknes, and Diseases to the common People,  
the Death or Downfal of some great and mighty Woman,  
Lady of high Birth; for the ♃ is Lady of the tenth, and  
♄ is Significator of the Great and Mighty, as well as  
the common People. I also fear a Scarcity of Corn from the  
☉ of the ♃ in the fourth, in exact ☐ to ♄ in the As-  
cendant, and that from Cardinal Signs. ♀ Lady of the As-  
cendant in ♀ going to the ☐ of ♂ may signify that Whor-  
ship will be more common at this Time than usual; and that it  
will

## Astrological Observations, &c

will be carried on with much Treachery, Delusion, and deceit; for ♀ is in the twelfth, with ☿ in \* to ♀, also this ☿ and ♀ may denote many Diseases to end in Death; because ♀ is Lord of the eighth. ♃ is in Configuration with none but and altho' ♃ is strong, I cannot apprehend that he can much Good at this Time. At the New Moon, preceeding Ingress, the Sun is eclipsed in the third Face of ☿, and in eleventh House ♀ is Lord of the Eclipse, and he retrograde combuit, it hath Significations of Detriment and Damage Priests, Lawyers, and Merchants; with the Downfall and destruction of some great Person living in some Place under Dominion of ☿, neither will those Places under ♀ be free the Full Moon succeeding, ☿ is angular in the seventh, in the Lion's Heart, and the Sun and Moon both afflicted by one by his Body, and the other by his ☿; from which may be expected no less, than that Soldiers will be brisk and bold and rampant; and that there will be much Sickness, and many Oppressions in many Parts and Places; and as touching the Weather, I take it to incline to Wind and Storms, warm for the Season.

Having done with the four Quarters, I come now to say a Word or two of the late great Comet; and Mr. *Wing* tells me it first appeared the 23d of *December* 1743, in 15 Degrees of ♋ with about 19 Degrees of North Latitude; but I rather think it first appeared about the Middle of *December*, or before, in ♋; because a Friend of mine said he saw the Comet a considerable Time before *Christmas* one Morning early, going down 19 or 20 Degrees of ♋, indeed it might not be observed till the 23d at least, not to Mr. *Wing's* Knowledge; however be that as it will, Mr. *Wing* wrote very well and learnedly thereon, I wish he had been more large. But as to those who deny the Influence of Comets, or of all Astrology in general, I value not their Sayings of a Rush, nor Writings nor being assured that Comets have an Influence, and that the Art of Astrology is true, and that may be proved from Scripture; but I own many pretended Artists have abused it; nevertheless the Art is true in itself, altho' it has been corrupted by ignorant Pretenders. But no more of this, but to proceed: The great Judgment of the Significations of Comets is one of the hardest Parts of Astrology, because the Ancients were ignorant of what Comets are, and this Age affords but few good Astrologers; therefore I hold it best to discover from History what has happened in the World upon the Appearance of former Comets.

## *Astrological Observations, &c.*

then we must be sure that the former Comets that we make Observation upon, are the same Star with this present Comet, only its former Appearance: Now to do this, we must know its Revolution, but of that I am not certain, yet I am very apt to believe its Revolution to be about 79 Years; because if we look back, we may find, for several Revolutions, that a Comet has appeared in that Period of Time: For if we subtract 79 Years from 1743, there will remain 1664, in which Year a Comet appeared, and take 79 from 1664, and there remains 1585, in which Year a Comet appeared also; and take 79 from 1585, and there remains 1506, in which Year a Comet appeared; and then take 79 from 1506, there remains 1427; but in this Year I find no Comet; but this may be a Fault in the Account of the Comets I have by me, because I have two Accounts by which one of them misses that of 1506, and why may not one of them miss this: I also find other Defects in both the Accounts: then if we take 79 from 1427, there remains 1348, in which Year I find no Comet; but there was one in 1347, and this is but one Year's Difference, and may well pass for the Comet's Revolution; for it is not to be thought that the Revolution of the Comet is just exact 79 Years, and no odd Time at all. And if we take 79 Years from 1348 there Remains 1269, in which Year there was a Comet. I shall pursue it no further, but in former Times, when there was no printing the Appearance of a Comet, might be easily let slip without any Remark. Also I think this is sufficient to prove that 79 Years is the Comet's Revolution, especially, if it should appear again in 1822; which I desire may be observed, tho' few now alive can expect to see that. I should now proceed to the Histories of those Times, but have an Account of what then happened, but not having time to consult History at the writing hereof, I shall pass it very briefly; beginning with the Year 1269 and so proceed to the present Time. In 1269 a Comet appeared, this was in the End of the Reign of *Henry III. King of England*, who was at War with *France* and beat them, and three Years after *Edward I.* began his Reign, had War with *Scotland* and beat them, and took their marble Chair wherein the Kings of *Scotland* were wont to be crowned. In 1347 a Comet appeared, King *Edward III.* at War with both *France* and *Scotland*, and beat them both. And in 1348 it reigned from Mid-summer till Christmas. A Plague all over Christendom, and so raging in England, that scarce the tenth Person of all Sorts were left alive.

With

## Astrological Observations, &c.

With a great Murrain on Cattle, and great scarcity. flourished that famous Doctor *John Wickliffe*, whose Followers those *Papist* Times were called *Lollards*. I shall pass by because I find no Comet in that Year. In 1506 a Comet appeared. *Martin Luther* now flourished, that great Reformer of Religion. In 1509 King *Henry VIII.* was crowned, about 11 Years after the Comet's Appearance, the *Turks* took *Jerusalem*, and added to their Dominions: For further Information see the History of those Times. In 1585 a Comet appeared and in 1588 was the *Spanish* Invasion, when the *Spaniards* came to invade *England* with their invincible Army, as they called it, and the Pope had Christened it, and sent it to subdue *England*: but the renowned Queen *Elizabeth* subdued that whole Army in about a Months Time destroyed it; to her immortal Honour and Fame, and thereby made the Pope's Basilim just to Christening of Armies. In 1664 a Comet appeared, 1665 was the War between the *English* and the *Dutch*, and the *Dutch* was beaten; and one of the greatest Plagues that was in *London*. And in 1666 *London* was burnt.

I shall say no more, but leave it to every one's Consideration; not that I be thought that all these Things are signified by this Comet, if this be true, because there are other Comets; and also of the Planets Configuration, all which must come in for their Parts of Influence all the Transactions of the World. Neither am I sure that this is the Comet's Revolution, only I say we have great Reason to believe the Comet's Revolution to be 79 Years, because Comets have appeared so many Times, so exactly as the Revolution of 79 Years; and now I will give you the Years of the Appearance of all the Comets from 1269 to this present Time, according to the best Account I have by me.

1269	1337	1402	1472	1516	1539	1569	1597
1285	1347	1403	1475	1522	1541	1572	1604
1298	1352	1433	1477	1523	1542	1573	1607
1299	1363	1439	1491	1527	1543	1577	1613
1300	1375	1444	1492	1529	1545	1578	1612
1301	1380	1456	1500	1530	1554	1580	1614
1304	1382	1457	1504	1531	1556	1582	1615
1305	1391	1458	1506	1532	1557	1585	1617
1313	1400	1460	1511	1533	1558	1593	1630
1314	1401	1470	1515	1538	1560	1596	1632

And the 2 late Comets in 1742 and 1743, also in the Year 1577 were 2 Comets; and in 1472 were 2 Comets; and in 1506 were 2 Comets; 1529 were 4 Comets; and in 1537 were 2; and in 1578 were 3; 1618 were 4 Comets; and we have never been 60 Years without a Comet since the Birth of our Lord Saviour, till from 1682 to 1742; from which Time may see that there are many Comets, and that no Comet has a less Revolution Time than 60 Years to re-appear in: But some Authors say, the Revolution is 75 Years and some odd Days, and that is accounted the Revolution of the Comet in 1682, which if so, it must then appear again in 1757. But however many Comets there be, or whatever their Revolution be, certain they carry very significant Effects with them; and so kind Remembrance till another Year farewell.
